

## PRO-CORE

---

### DB10PCGP

- Premium diamond technology.
- Reinforced core preventing wobbling or deflection of the blade for intense cuts.
- Continuous rim kerf of 0.06 and 10mm rim height.
- Longer blade life due to kerf size.
- Providing consistent clean cuts.
- Blade diameter of 10" | Arbor  $\frac{5}{8}$ "
- Wet cutting only.

## GLASS

---

### DB10PGLASS

- Fine diamond technology for glass tile.
- Blade diameter of 10" available.
- Continuous rim.
- Arbor size  $\frac{5}{8}$ " or 1"
- RPM of 6,150
- Wet cutting only.

## GRINDING

---

### DBGD5

- Vacuum brazed diamond grinding wheel.
- Cut, grind, and/or enlarge holes in tile.
- Entire blade surface used for cutting or scribing.
- Perforated blade surface for faster cooling of blade and a more efficient grinding capability.
- Blade diameter of 5"
